

CUSTOMER INFORMATION

TRY TO UNBLOCK YOUR DRAINS USING A PLUNGER

Of course we like to come and help our customers whenever they require the help of a professional plumber. BUT...there are some of you who are handy around the house and more than capable of trying some home remedies to unblock your toilet or sink

THE BASICS

- ✓ Fill the toilet/sink/bath with water..helps to create pressure
- ✓ Pull the plug (if unblocking a sink/bath) and quickly place the plunger over the drain
- ✓ Push down onto the drain to create a seal
- ✓ Vigorously move up and down (approx 12 times) being careful not to break the seal.
- ✓ Release the plunger and if the water does not go down, repeat process.
- ✓ Repeat x3 and if the blockage still doesn't move then please call us!

HOW TO UNBLOCK A TOILET
