

CUSTOMER INFORMATION

WANT YOUR DRAINAGE FIXED, BUT ARE YOU WORRIED ABOUT THE COST?

- ✓ You are right to be concerned about any drainage issues you are experiencing
- ✓ To reverse some of the more complicated drainage problems, it can be quite costly, but we will **ALWAYS** endeavour to find a solution that suits your requirements and budget.
- ✓ **PLEASE** be aware that a lot of plumbers always try and go for the immediate upsell of their services, and demand that the only solution to your problem is a complete sewer dig up and pipe relining..This isn't always the only solution.
- ✓ Get Plumbing will always invest their time and knowledge in providing comprehensive drainage services, helping to keep all costs down for our customers.

Q. DO I NEED A CCTV INSPECTION OF MY DRAIN?

A. It is not always necessary for our serviceman or woman to undertake a CCTV inspection of your drain. For minor blockages, they are usually able to clear these without the assistance of the camera.

However, for the more stubborn blocked drains, we always recommend that our customers invest in a CCTV report. Once our serviceman has sent the camera down the line they can clearly identify what is the source of the problem, and if any damage caused will have detrimental effects on the welfare of your drainage system.

DRAINAGE MAINTENANCE PLANS AVAILABLE

We can take control and keep your drains clear and free flowing. Our jetting maintenance program will be tailor-made to ensure your drains are kept blockage free.
